Description:

TQ01175293, Approximate

Site: 1225309\*o Brick and concrete vertical-sided lock with wooden gates on site of earlier timber structure. Earlier wooden structure recorded in 1826 as being 77 feet 3 inches in length, 14 feet 7 inches wide and with a fall of 7 feet 6 inches (GMR 129/1-7/1). This was not the earliest structure as it was 'new' built at least once previously in 1745 at the cost of £303-4s-4d (GMR 129/7/1). It was rebuilt 'almost entirely' in 1861 (GMR 129/105), but even this was probably largely in timber. Altered to present style gradually over later 19th and 20th century. For instance, the 'lower end' was rebuilt in concrete in 1905 and in 1927 the sides were rebuilt in the same material (GMR 137/12/40).

Visited: 08 Dec 1995

Management recommendations:

Site: 0122530\*o All water-control features connected with the navigations should be subjected to specialist survey.

Compiled: 08 Jan 1996      Date: 27/06/2008      Compiler Emily Brants

**Summary: Parts still alive, but much dead wood in head. Hollow and**

**Environment Land Use: Geology:**

Description:

TQ01175286, Approximate

Site: 122532\*0 Remains of a large oak tree. Parts still alive, but much dead wood in head. Hollow and supported by iron brace. Invades towpath, needing iron railings on bank as safety precaution. Situated between towpath and Mill House (private) garden. Estimated between 250 and 350 years old, possibly originating about the same time as the navigation.

Visited: 08 Dec 1995

Management Recommendations:

Site: 122532\*0 As this tree is in a poor state, it should be monitored regularly. Should it fall, at the least, it will tear a large hole in the bank. At the worst, it will fall into the navigation blocking it, and causing severe bank damage just above a major lock.

Compiled: 08 Jan 1996

Date: 27/06/2008

Compiler Emily Brants

## SMR No: 15855 - Post-medieval weir,

**Grid** TQ00915265 - Area  
**Square:** TQ05SW  
**Condition:**  
**NMR No:** **Ownership:** Single

### Summary

**Evidence: Type (Old):**

Description:

TQ00915265, Approximate

Site: 122533\*0 Post-medieval weir, described as causing floods to adjoining meadows in claims against the Navigation in 1671 (Carter 1965). This is one of the four original 'tumbling bays' created during the initial construction of the Navigation in the 1650s. It is now a concrete and iron structure with winding gear, rebuilt in the 20th century, probably in conjunction with flood relief schemes in the 1930s. Water runs freely over the weir on either side of iron weir gates in the centre.

Visited: 08 Dec 1995

Management Recommendations:

Site: 122533\*0 All water-control features connected with the navigations should be subjected to specialist

survey.

Compiled: 08 Jan 1996

Date: 27/06/2008

**SAM No:**

**Whole Antiquity?:**

---

Description:

TQ02135319, Approximate

Site: 122535\*0 Wooden turning roller on sharp bend in navigation. Vertically mounted roller to assist horse drawn barges. There are mountings for two other rollers here also.

Visited: 08 Dec 1995

Management Recommendations:

All mechanical and similar features connected with the navigations should be subjected to a specialist survey.

Compiled 08 Jan 1996

Date: 27/06/2008

Compiler Emily Brants

## SMR No: 15857 - Good system of possibly early watermeadows.

**The main carrier follows a boundary about**

**Grid Reference:** TQ01905305 - Area

**Square:** TQ05SW

**Condition:**

**NMR No:**

**Ownership:** Single

---

**Scheduling**

**SAM No:**

**Whole Antiquity?:**

---

Description:

TQ01905305, Approximate

Site: 122536\*0 Good system of possibly early water meadows. The main carrier follows a boundary about 250m north of the navigation, mirroring the curve of the latter. The subsidiary carriers are not easy to see on the ground from some angles, but they comprise shallow gulleys, often less than 0.1m deep. They are marked by a lush growth of grass. These come off the main carrier at right angles. Over much of the meadow is a second main carrier parallel with the other, but about 50m further south. Sir Richard Weston is supposed to have created a 'flowing river' of some miles in length here to feed the meadows of Sutton Park some years before the navigation was begun. The exact line of this system is not known, but it may have followed the northern carrier of this system, and possibly part of the navigation itself further downstream.

Visited: 08 Dec 1995

Management Recommendations:

Site: 122536\*o All water control features connected should be subjected to a specialist survey. The main sluice was probably on the old river arm near TQ 01245314 on private property that was not accessible. An extension of the main carrier follows the left bank of the navigation intermittently as far as TQ 01535412.

Probable Description

**New Parish:** Surrey 15998

15997

Description: National Trust Property, TQ01245296, approximate

Site: Site of old wharf, partly in NT ownership, partly on private property. The more important remains probably on NT bank. A wharf is shown here on the tithe map for Worplesdon (1838). Wharves are mentioned at Bowers from an early date. There is an 'old wharf' field name on the downstream side of the lock, so it is possible this site is a later wharf. It seems to have fallen out of use in the later 19th century, as little is heard of it after 1838. There is no obvious sign of the wharf on the site today, although that part which would have been used for storage behind the wharfage front is now under private gardens concealed behind a high wooden fence. Visited: 29 Nov 1995.

Management Recommendations:

If bank repairs are proposed in this vicinity, archaeological advice should be obtained from Cirencester beforehand.

**County: New Parish:**

Surrey

Site:122748\*0 Site of old bridge to Jacobswell, now a dead end because of a newer road bridge to north. This is one of the historic bridges over the Navigation, frequently mentioned in 18th and 19th century. Now a single span iron bridge with brick breastworks, much modernised. Rebuilt in 1928 (GMR 137/12/40, p. 61) and again in 1934. Visited: 19 NOV 1995

**Management Recommendations:**

Site:122748\*0 All historic bridges over the Navigation should be included in an architectural survey.

ENHANCED NATURAL FEATURE RIVER NAVIGATION			Post Medieval	17th Century

### Environment Land Use: Geology:

**Height: m**

15998

15925

Description: TQ02155317, TQ01175298 Linear

Site:122772\*0 Section of old river channel used by the Navigation. It runs through open meadows adjoining Sutton Park on the north. It was once meadow on the south, but this has now been cut off from its historic landscape to the south by the A3 embankment. According to the tithe map for Worplesdon there was a field here called 'Old Wharf', near to where the A3 comes closest to the river bank. There may have been an early wharf here, before the Bowers Wharf was transferred to the site shown in 1823 on Bowers Cut. The land on the A3 side has been largely abandoned because of the closeness of the embankment, and is reverting to scrub alder woodland. Visited: 01 MAR 1996

### Management Recommendations:

Site:122772\*0 Before any structural alterations to the banks of this section are undertaken, the management should seek advice from the archaeological advisers at Cirencester. In particular care should be taken not to disturb old watermeadow carriers running from the banks but now largely hidden. Compiled: 20 MAY 1996

Description: TQ02175317, Approximate

Site:122788\*o Wooden towpath roller attached to iron girder on sharp bend below Broad Oak Bridge.

Also other fixed tackle to aid turning on this bend includes concrete bollards with fixed iron pulleys to support a barge rope. Visited: 29 JAN 1996

Management Recommendations:

Site:122788\*o Original tackle on the Navigation should be actively preserved against decay.

Compiled: 18 JUN 1996

A Samian cup, form Dr 27, cut down and worn and abraded, stamped ARDACI, and to be dated c. AD 45-60, is in Guildford Museum. It has no accession number but contains a label stating that it was found 'at Burpham, Wingledon (Romano-British settlement)'. As it is much earlier than the vessels associated with SMR No. 508 and has no further association with them than its Burpham provenance, it is best regarded as a separate find/site.

Site investigated in advance of construction of A3 because of known human burials from area (SMR no. 508) and place name Burpham, which might suggest a defensive enclosure formerly existed on the hill top. The site has been heavily damaged by recent sand and clay quarrying. The few intact prehistoric features are difficult to explain unless they are clay pits. pottery very fragmentary, but LBA?EIA type. The finds and archives are in Guildford Museum.

**County:** Surrey **District:** Guildford **New Parish:** Guildford **Environment**

**Land Use:** built over **Geology:** Alluvium **Height:** 30m

**Address:** Bowers Mill House, Bowers Lane Guildford Surrey GU4 7ND

**Description:** BOWER'S MILL

**Old Parish:** Worplesdon

The first mention of the mill was in 1733, when it was apparently a paper mill. By 1779 a corn mill was also at the site, and the occupier, Daniel Eaton, insured the contents of both the paper and corn mills for £1000. Paper-making was discontinued soon after and in 1793 only corn was milled, by Benjamin and Richard Kidd. On the First Edition of the Ordnance Survey map of 1816 and Froggett's map of 1831 the site is marked as an oil mill. By 1831 the site was recorded solely as a corn mill, and was occupied by Thomas Chandler. In the Tithe Apportionment of 1841, William Holden was the occupier, followed by Thomas Peerless in 1845, John Holden in 1847, until Edwards Childs took over in 1870, with the firm of Lintott & Sons continuing until 1877. It was converted into a roller mill, towards the end of the 19th century, by the firm of Messrs. Ranger & Burrows. A trade magazine mentions the installation of a 'Turner Roller

System' in 1890 which was powered by the extant breastshot waterwheel, 16ft in diameter by 12ft wide. Messrs. Ranger & Burrows were in control until 1899 after which the firm was renamed Ranger & Co., but by 1910 milling had ceased. A report on the mill in 1932 recorded that it was timber-framed, rectangular and low, with brick up to the first floor then weatherboarding under a tiled roof, which was all in a state of disrepair. The mill building was demolished in 1945 and the timber roof was removed to the estate of the Duke of Sutherland, who lived at the nearby

Sutton Place. Water power for the mill was provided from the River Wey Navigation at a point to the south of Bower's Lock. The lock gates bear the date 1933 and therefore it was probable that the mill race, and other associated watercourses, were removed at this time.

*Compiler* Louise Martin

*Source:* 2. Hillier, J. (1951) *Old Surrey Water Mills*: 109.

Senex's map of Surrey, published in 1729, shows an unnamed paper mill at Broadoak Bridge (see Ant.3965). No direct evidence for a mill at that location has been found and it is suggested that Senex meant to mark Bower's Mill, which is known to have been a paper mill from 1716-1790. No mill is shown on Senex' map at the location of Bower's Mill.

Romano British pottery found AD 1897.

*Source:* OS 6" 1934. *Date:* 22/04/1985 *Compiler* Martin O'Connell

Romano-British burials accompanied by pottery were found at Burpham C1897. The pottery is chiefly in private hands but some of it is in Guildford Museum, including a small 2nd century Samian bowl (Acc no. 267) and a small bowl for pins and ornaments (no Acc no.) which are on display. The siting given by the OS ref falls within an area of sand and clay workings on the edge of the River Wey terrace they are now disused and under pasture. Local enquiries failed to produce evidence of more recent finds.

*Source:* A.C. - 19.3.85 *Date:* 22/04/1985 *Compiler* Martin O'Connell

A detailed discussion of the pottery was published in 1983.

*Source:* Bird, J. 1983, Roman pottery from Burpham, SAS Collection. 74, 221-223.

*Date:* 22/04/1985 *Compiler* Martin O'Connell

The pottery is illustrated and discussed (vessel nos. 1,3 and 4). 1 = GMacc.no. 2265 Samian bowl, dr 37, dated c. 150-80. 3 = (no acc no. but formerly on display and probably 'the small bowl for sites and monuments' mentioned among the 19th century discoveries) is a samian cup, of Hadronic or Antonine date. 4 = (GM no. 52314/268) is a probable Alice Holt/Farnham jar, date to the late 2nd or early 3rd century. The pots suggest the cemetery was in use during or after the later 2nd century.

**Description:** PIMMS ROW, 43, 45, 47 Burpham Lane, Guildford

TQ 05SW GUILDFORD BURPHAM LANE north-west side) Burpham 2/170 Nos 43-47 odd) Pimms Row II

Row of 6 cottages, now 3. Mid C18, altered. Red brick in Flemish bond, plain tile roof. 2 storeys, 6 bays. Cottages formerly one bay each set in handed pairs with doors to outside. Segmental header-brick arches to openings, the doorways with modern frames and board doors, the windows with C20 6-pane, 2 light casements and projecting wooden sills. Norwich Union fire insurance plaque below eaves between bays 3 and 4. stepped dentilled eaves. Roof hipped at left end and with ridge stacks between bays I and 2, 3 and 4, 5 and 6. Rear: added single storey, gabled kitchen wings. Interior of No 43: some older timbers reused as beams; timber framed partition wall between front and rear rooms in right-hand bay has square panels and long straight brace; queen-post roof truss. Reference is made in an indenture of 1909 to a late C16 indenture concerning this property, but from the architectural evidence, although earlier materials are incorporated, the row as it now exists was built in the C18. It is thought to have been built for a local brick works. Listing NGR: TQ0124352260

## 2/5 Church of St. Luke II

Church. 1859 by Henry Woodyer, porch added in 1961. Rough-dressed coursed Bargate stone with ashlar plinth and dressings; plain tiled roof over. Ashlar bellcote under wood-shingled spirelet. Nave and chancel with bellcote to west and porch to south. Lancet fenestration in Early English Style with sill string courses and two buttresses below on north and south sides. Full height buttresses at junction of nave and chancel. Gabled porch to south with chamfered entrance arch and hollow-chamfered door surround. Shouldered head to door with scrolled C-strap hinges. Paired, foiled-head lancet fenestration on the chancel with 3 windows on the south side. 5-light east window with lights stepping up towards the centre, quatrefoil panel above. Further eastern lancet window, in end of pent-roofed vestry along the north side of the chancel. 2-light leaded casement fenestration on the vestry with quoined offset stack at the junction of the chancel. Arched vestry door faces west. Central buttress to west end of church with flanking lancet windows. Wheel window above with baluster 'spokes' and floral carving in deep chamfered surround. Bellcote on gable apex with paired human-head corbel stops; attached shafts with moulded caps and plinths to east and west fronts of bellcote, one shaft on north and south sides. Wooden canopies project over the shafts on the east and west faces. Interior:- Scissor-braced 5-bay nave roof with through purlins. Chamfered chancel arch with jamb shafts and moulded caps and bases. Chancel roof with two tiers of purlins with cusped windbracing and arched collar braces to long post trusses. Trefoil-head two-light rear window arcades, the east window arcade with dogs-tooth decoration and girdle moulding on jamb shafts. C19 pulpit of standard design. Unusual sedilia placed under south east chancel window arcade.
